

Speaker for the 9/11/10 Meeting

# Commercializing Your Invention

with Evergreen IP, a Professional Product Development Company

You have the next big thing, a product that will sweep the nation in sales if only you knew how to get it to market. You have read some books maybe took some courses but it all seems too complicated. It is just TOO MUCH WORK! Isn't there someone out there who would be interested in taking that ball and running with it?

The answer may be Evergreen IP. PLEASE NOTE, I did say MAY BE because Evergreen IP IS a Professional Product Development Company and they ARE looking for the next big thing. A product that WILL sweep the nation in sales but it has to be huge to impress them.

**Gus Bigos** has been in the business for many years and has seen it all. The Good News is he is still LOOKING and he will be looking here at our meeting on 9/11/10 at 1:00 pm at the LIGI Tool Company (3220 SW 15<sup>th</sup> Street Deerfield Beach, FL 33442).

Here is your chance to:

- Find out what a professional looks for in a product
- How they determine which products to pursue
- How to increase your chances of success
- What goes into a standard licensing deal
- Ask all those questions no one else has the answers for.

As a special bonus, Gus will talk about Evergreens' new agreement with Clorox. What Clorox is looking for and how YOU can submit your ideas for consideration.

How many opportunities like this are you going to get? Not only are they asking for your ideas but they are telling you just what they are looking for. Could it get any easier!
