

Speaker for the October First Meeting

Steven Sponder

(Serial Entrepreneur & Successful Inventor)

After reading this man's bio I wanted to give him a cape and paint a huge S on his chest. The man is Incredible! He will be sharing the knowledge he has gained through his experiences developing Disruptive Technologies.

Steven has founded companies in multiple industry sectors. He has created everything from award-winning restaurant concepts to a venture capital funded information technology company.

He has formed strategic partnerships with some of the world's leading corporations including Microsoft and AOL Time Warner. He has led organizations through all stages from original concept creation through mergers and acquisitions.

Steven also serves on business and non-profit advisory boards (Florida Atlantic University College of Business Dean's Executive Advisory Council and the FAU College of Engineering and Computer Science Industry Advisory Council) and volunteers as a mentor to aspiring student entrepreneurs. Mr. Sponder founded VPLENISH® Nutritionals, Inc. and the Vplenish-The-World children's vitamin foundation, a 501(c) (3) non-profit charity that donates essential vitamins to children in need around the world.

Disruptive Technology is very similar to what the PDMA calls Radical Inventions. Game Changers! We have all lived through the implementation of So Many Disruptive Technologies, I believe we are becoming complacent about them.

Think about the advances in electronics, medicine, machinery and especially consumer goods in just the past 2 decades. It is astounding!

This is what those dream companies that we want to license our products look for. We can all recognize Disruptive Technology in the big stuff like computers and telecommunication devices, but think about it, the Swiffer radically changed the way we clean the floor.

This is why there is no way you should miss this amazing opportunity to come and hear this man who has successfully applied the principals of Disruptive Technology first hand.

The Inventors Society of South Florida (a 501 (C) 3 non-profit organization) is extremely proud to present, **Steven Sponder** at the LIGI Tool & Engineering, Inc. (3220 SW 15th Street Deerfield Beach, Fl 33442) at 1:00 pm on Saturday 10/1/11.
